PERSONAL PROFILE

High-achieving Chemical Engineering graduate leveraging a strong analytical foundation to drive operational excellence in the FMCG supply chain sector. Currently pursuing an MSc in International Supply Chain and Logistics Management at Cardiff Metropolitan University, while serving as President of PPI Wales (Indonesian Students' Association) and working in a UK food manufacturing environment supplying Marks & Spencer. Previously Head of Transport Controller at Wings Group, overseeing regional distribution strategy and logistics optimisation for Central Sumatra. Seeking to advance expertise in Supply Chain Management by combining engineering aptitude with strategic business frameworks.

PROFESSIONAL EXPERIENCE

2 Sisters Food Group (Rogerstone site, supplier to M&S Food) Newport, Wales, UK
Production Operative (Part-time) *Oct 2026 – Present*

- Work in a fast-paced, high-volume food manufacturing site supplying Marks & Spencer Food, following strict food safety, hygiene and quality standards.
- Support daily production and dispatch targets in a team environment, meeting time-sensitive schedules and customer (retailer) requirements.
- Working part-time alongside my MSc to gain hands-on understanding of manufacturing factory operations, directly supporting my studies in supply chain and logistics.

PT Sayap Mas Utama (Wings Group) Jakarta, Indonesia
One of the largest Fast-Moving Consumer Goods (FMCG) companies in Indonesia.
Head of Transport Controller *Aug 2026 – Sep 2026*

- Directed the overarching transport operations and logistics strategies for the entire region.
- Managed the transition and handover of strategic logistics operations prior to relocating to the UK for postgraduate studies.

Senior Area Transport Controller *Apr 2024 – Jul 2026*

- Oversaw transport operations for the entire Central Sumatra Region, covering Padang, Riau, Jambi, and Bukittinggi business groups.
- Directed regional distribution strategies to ensure operational excellence, cost efficiency, and timely delivery across the supply chain network.
- Implemented a driver relay system to optimise transport distribution in Central Sumatra, reducing delivery lead times from approximately 2 days to 1.2 days.
- Monitored and evaluated logistics Key Performance Indicators (KPIs) to identify bottlenecks and implement continuous improvement solutions.
- Awarded "Best Transport Controller" twice (2025 and 2026) for outstanding performance in optimising regional distribution operational standards.
- Served as Super User Trainer for SAP S/4HANA, training colleagues on the system during its rollout at Wings Group.

Area Transport Controller *Oct 2023 – Apr 2024*

- Managed transport operations specifically for West Sumatra and Jambi provinces.
- Controlled daily logistical activities to ensure alignment with corporate distribution targets.
- Analysed transport data to improve route efficiency and reduce operational costs while maintaining service levels.

National Transport Procurement & Master Data Officer *Sep 2022 – Sep 2023*

- Managed strategic relationships with national-scale Third-Party Logistics (3PL) providers.
- Identified and secured new partnership opportunities to expand the company's logistical capabilities.
- Implemented Vendor Performance Reviews (VPR) to evaluate existing partners and set rigorous performance benchmarks.

PT Aimtopindo Nuansa Kimia Bandung, Indonesia
Process Engineering Intern *Dec 2021 – Feb 2022*

- Evaluated and optimised the process design for the CO2 liquefaction plant (PT Sarana Indo Energi Randegan) to ensure operational efficiency.
- Collaborated with senior engineers to calculate detailed mass and energy balances and reviewed Piping and Instrumentation Diagrams (P&ID).

Microbiology Laboratory, UNPAR Bandung, Indonesia
Laboratory Assistant *Jan 2022 – Jul 2022*

- Assisted faculty members in preparing microbial cultures and laboratory equipment; supervised students during practical sessions to ensure safety protocol compliance.

EDUCATION

Cardiff Metropolitan University Cardiff, UK
MSc International Supply Chain and Logistics Management *Sep 2026 – Present*

Parahyangan Catholic University (UNPAR) Bandung, Indonesia
Bachelor of Engineering in Chemical Engineering *Aug 2018 – Jul 2022*

- GPA: 3.55/4.00 (Passed with Distinction).
- Final Research Project: "Effect of Temperature on Metal Ion Leaching Process From Spent Catalyst Co-Mo/Al2O3 in Sulfuric Acid (H2SO4) and Subcritical Water Solvent Media".
- Successfully optimised the recovery parameters for Cobalt and Molybdenum ions, demonstrating the viability of subcritical water as a sustainable green solvent alternative for catalyst recycling applications.

Regina Pacis High School Bogor, Indonesia
High School Diploma (Science Stream) *2015 – 2018*

LEADERSHIP & RESEARCH EXPERIENCE

- **President, PPI Wales (Indonesian Students' Association in Wales)** (Nov 2026 – Present): Elected to lead the Indonesian student community across Wales for the 2026/2027 term, representing students from universities and cities including Cardiff, Swansea and Aberystwyth; coordinate community events and engagement with universities and external partners.
- **Undergraduate Researcher (UNPAR):** Executed a 6-month experimental study demonstrating the viability of subcritical water as a greener alternative solvent and determined optimal temperature conditions for maximising metal ion recovery.
- **Head of Student Affairs Division (HMPSTK):** Spearheaded internal student activities (Jan 2021 – Dec 2021) aiming to foster cohesion across four active batches; managed a team of 6 to launch initiatives such as Sports & Arts Week and a podcast.
- **Vice Head of Event (Student Development 2019):** Oversaw planning and execution of engagement events for the Class of 2019.
- **Coordinator of Decoration Division:** Led a 20-member team to execute visual concepts for a 250-participant gathering, receiving the "Best Design Concept" recognition.
- **Batch Representative (2018 – Present):** Elected primary liaison between the student body, association, and faculty department.

SKILLS & TECHNICAL PROFICIENCIES

- **Leadership & Teamwork:** Elected President of PPI Wales; led a 20-member team and managed a team of 6 to deliver events on schedule; reliable team player who adapts quickly to new environments.
- **Customer Service & Communication:** Friendly, professional communicator with experience dealing with vendors, drivers, and internal stakeholders on a daily basis; MC experience at university events, comfortable speaking to and engaging with people.
- **Working Under Pressure:** Handle time-sensitive daily operations and delivery schedules in fast-paced FMCG and food manufacturing environments; punctual, organised, and detail-oriented.
- **Transport & Logistics Systems:** Functional expert in transport operations at Wings Group; solid understanding of Transport Management System (TMS), transport planning and fleet management, including route planning, vehicle and driver allocation, and delivery performance monitoring.
- **Numeracy & Accuracy:** Accurate with figures and data, from analysing transport data and managing master data to reporting in SAP and Google Sheets.
- **Digital & Creative:** Creates short-form video content using CapCut and Canva; comfortable learning new apps and systems quickly.
- **Languages:** Indonesian (Native), English (Professional Proficiency).
- **Business Tools:** Microsoft Office (advanced Word, Excel and PowerPoint), SAP ECC and SAP S/4HANA, Power BI, MicroStrategy Business Intelligence, Google Sheets (Apps Script & logic functions), Google Slides.
- **Engineering Software:** Aspen HYSYS, MATLAB, AutoCAD.
- **Laboratory Expertise:** Leaching Processes, Centrifugation, UV-Vis Spectrophotometry, Titration.
